

susceptible, the invention being defined and limited only by the terms of the appended claims.

I claim:

5 1. An animated toy comprising a bulbous transparent hollow body, a flexible stem having one end connected to one of the walls of said body and arranged to extend outward thereinto, and an object mounted on the
10 free end of said stem within the body to vibrate and strike the inner walls of the body when the latter is agitated from side to side.

2. An animated toy comprising a bulbous
15 transparent hollow body, a flexible stem comprising a coiled spring connected at one end to one of the walls of said body and arranged to extend outward thereinto, and an

object mounted within the body on the free end of said stem to vibrate and strike the
20 inner walls thereof when the latter is agitated laterally to serve as a rattle and a handle on the body by which it may be agitated.

3. An animated toy comprising a bulbous
25 transparent hollow body formed of celluloid, a flexible stem formed of coiled wire having each end cemented into a cupshaped member, the cup at one end being connected to the
30 wall of the body, an object connected to the cup at the free end of the stem to vibrate within the body when the latter is agitated from side to side, and a handle on said
body by which the same may be agitated.

In testimony whereof I affix my signature. 35
ARTHUR V. DA COSTA.
